

Image Media Trap sheet template for DVD Amaray Case

We print high resolution so make sure your file is minimum 300 dpi and CMYK. We prefer a Photoshop (PSD) file with all layers separated but PDF and EPS will do fine as well (changes or adjustments are more difficult with PDF and EPS therefore there may be a charge for artwork if we have to make too many adjustments). Include all fonts when submitting PSD files or be sure to convert fonts to curves or outlines when using other formats. We are PC based so please be sure to save your MAC files accordingly.

Also be sure to place a 1/8 th inch bleed on the outside of the trap sheet. Please contact us with any questions you may have, we will be glad to help.
