

Discrete & Continuous Modelling • MACM202 • Lab Report #2

- usual lab report format.
- due in the MACM202 box monday (evening) 20 january.
- submit a joint report with your lab partner.
- poorly annotated figures will definitely receive low grades.
- almost every figure in the last assignment could have used more constructive annotation.
- be as quantitative & systematic as possible.

Study #1

- page limit: 2 pages typeset (3 handwritten) + 2 pages figures.
- hint: *help subplot* may give you more versatility in your figure budget; but remember, small figures may be less effective.

Study #2

- page limit: 2-3 pages typeset (3-4 handwritten) + 5 pages figures.
- you may include a few additional figures in an appendix — but don't go killing trees needlessly.
- make sure each image makes a point, which is also annotated clearly on the plot.
