Highlights of 2000 and 2001

At their annual meeting in May 2001 the Editorial Board of *Classical and Quantum Gravity* nominated their personal highlights in the journal over the past year. We are delighted to offer these here as a free taster of the full content of the journal.

This is intended not as a list of the 'best' articles, but as an interesting and stimulating reading list. Articles were selected for many reasons; some contain outstanding research and breakthroughs while others are valuable reviews of the field. Some have an especially clear exposition and are beautifully presented; others are instructive containing results and tools useful to many readers.

On behalf of the Editorial Board I hope you enjoy reading these articles, including those outside your direct field of research. Further information on how to read, write for or subscribe to *Classical and Quantum Gravity* can be found on the [journal's home page](#) or you can e-mail us at cqg@iop.org

Andrew Wray, Publisher

[Lectures from the Graduate School on Contemporary String Theory and Brane Physics, Turin, 26 January-2 February 2000 - No. 17, 7 September 2000](#)

This special issue presents six reviews and including material on noncommutative geometry and Ads/CFT. The authors are L Castellani, D Bigatti, T Mohaupt, M R Gaberdiel, A Zaffaroni and A V Belitsky, S Vandoren and P van Nieuwenhuizen.

TOPICAL REVIEWS
